

## Why the Port of Itaqui?

- It is located at an island, with ease of customs control, right in the geographic center of the FTAA, the Free Trade Area of the Americas.
- It is the second topmost port in the world in terms of depth, accepting any operational ship today.
- Features extensive surrounding facilities for the extension of activities.
- It is close to productive sources of raw goods, both mineral and agricultural.
- Its location is strategic in relation to the great commercial routes in the planet.

“ The Exports Zone of The State of Maranhão - Zema project, which is in progress at the Federal Senate, has the potential of shaking up the local economy, stimulating the productive calling of the State of Maranhão and of Brazil; boosting regional economy at the Midwest and promoting a better balance of regional inequality all over country. In just measure, it can represent economic redemption for some of the poorest areas of the country. All of that may be achieved without privilege, solely through the intelligent and rational harnessing of the natural particularities of the coast of the State of Maranhão. ”
